Java

```java
class Solution {
    public int minimumRounds(int[] tasks) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} tasks
 * @return {number}
 */
var minimumRounds = function(tasks) {

};
```

C++

```cpp
class Solution {
public:
    int minimumRounds(vector<int>& tasks) {

    }
};
```
